EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Price on 9/19/2007.

The application has been amended as follows: Claim 1 recites, "A computer-readable medium encoded with computer executable instructions for storing data...." Claim 19 recites, "A computer-readable medium storing a computer program used for enabling a computer to reproduced...."

2. The following is an examiner's statement of reasons for allowance: The present invention is directed towards generating an audio/video clip by multiplexing video and graphics streams. The independent claims identify uniquely distinct features, "when the active period of the control segment in the display set overlaps with an active period of a control segment in an immediately preceding display set, the time information designates the active period of the control segment in the display set to start at or after a time at which, during the active period of the control segment in the immediately preceding display set, transfer of graphics generated by decoding graphics data in the immediately preceding display set is completed." The closest prior art does not anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
